

List of filters

lar_free_shipping_value

Changes the minimum order value for free delivery.

Parameters

null|float \$value Current minimum order amount.

null|WP User \$user Logged-in user.

array \$items Order items (WC_Order_Item_Product).

Examples

```
function lar_free_shipping_value_for_authors($value, $user, $items) {
    if ($user) {
        if (in_array('author', $user->roles)) {
            $qty = 0;
            if ($items) {
                foreach ($items as $item) {
                    $qty += $item->get_quantity();
                }
            }

            if ($qty >= 3)
                return 0; // Free shipping for authors if there are 3
items or more.
            else
                return null; // Disable free shipping for authors if there
are less than 3 items.
        }
    }

    return $value;
}
add_filter('lar_free_shipping_value',
'lar_free_shipping_value_for_authors', 10, 3);
```

lar_method_cost_value

Changes the base cost of the Ship Discounts shipping method.

Parameters

null|float \$value Current shipping method base cost.

null|WP User \$user Logged-in user.

array \$items Order items (WC_Order_Item_Product).

Examples

```
function lar_method_cost_value_filter($value, $user, $items) {
    if ($value && $items) {
        $total = 0;
        foreach ($items as $item) {
            $total += $item->get_total();
        }

        if ($total >= 20)
            return $value / 2.0; // Cut the base cost in half if the total
amount is $20 or more.
        }

        return $value;
    }
}
add_filter('lar_method_cost_value', 'lar_method_cost_value_filter', 10,
3);
```

lar_carrier_display_cost_value

Changes the display cost for carriers.

Parameters

null|string|float \$value Carrier's current display cost.

string|float \$cost Carrier's base cost.

string \$carrier Carrier code

string \$service Service code.

null|WP User \$user Logged-in user.

array \$items Order items (WC_Order_Item_Product).

Examples

```
function lar_carrier_display_cost_value_filter($value, $cost, $carrier,
    $service, $user, $items) {
    if ($user && $user->ID) {
        if ($carrier == 'CANADAPOST')
            return $cost * 0.5; // Cut the cost in half for Canada Post
        carriers if the user is logged-in.
    }

    return $value;
}

add_filter('lar_carrier_display_cost_value',
    'lar_carrier_display_cost_value_filter', 10, 6);
```

lar_boxes_cost_value

Changes the total cost of boxes used.

Parameters

null|float \$value Current boxes cost.

bool \$enabled If the use of boxes is enabled.

null|WP User \$user Logged-in user.

array \$items Order items (WC_Order_Item_Product).

Examples

```
function lar_boxes_cost_value_filter($value, $enabled, $user, $items) {
    if ($enabled) {
        if ($items) {
            foreach ($items as $item) {
                if ($item->get_product_id() == 22)
                    return $value + 10; // If the product with ID 22 is in
the cart/order, add $10 to the cost.
            }
        }
    }

    return $value;
}
add_filter('lar_boxes_cost_value', 'lar_boxes_cost_value_filter', 10, 4);
```

lar_delivery_date_value

Changes the displayed delivery date.

Paramètres

string \$value Expected delivery date.

string \$carrier Carrier code

string \$service Service code.

null|WP User \$user Logged-in user.

array \$items Order items (WC_Order_Item_Product).

Exemples

```
function lar_delivery_date_value_filter($value, $carrier, $service, $user,
$item) {
    if ($carrier !== 'CANADAPOST')
        return ''; // If not Canada Post, hide the date.

    $timestamp = strtotime($value);

    if ($timestamp) {
        $timestamp = strtotime('+3 days', $timestamp); // Add 3 days to the date.
        return wp_date('Y-m-d', $timestamp);
    }

    return $value;
}
add_filter('lar_delivery_date_value', 'lar_delivery_date_value_filter',
10, 5);
```
